11 January 2016

January Function: Technical Talk & Site Visit – MTR train design history and visit to MTR's new ROTEM train

Date: Saturday 30th January 2016

Time: 9:30 am to 11:30 am

Venue: MTR Ho Tung Lau Depot

MTR has over 1,300 new train cars on order for new railway projects and to replace the existing first generation MTR and ex-KCRC trains.

CHKRI is organising a combined Technical Talk and Site visit on the history of MTR's train design and how it has evolved into the latest "MTR family" look. The talk will highlight not only the aesthetics, but also how improvements in passenger environment, customer service, information and safety are integrated into the overall design.

The technical talk will be followed by a site visit to MTR's newest train, the 9-car ROTEM train, which has just been delivered and has now started test and commissioning on the East Rail Line for the Sha Tin to Central Link project.

The speaker is Cheng Kwok Wai, Senior Architect of MTR.

The maximum number of participants for this talk and site visit is 20. Paid-up members will be given the first priority to participate in the visit and are eligible for an attendance certificate.

The itinerary is as follows:

- 09:30 Assemble at MTR Fo Tan Station concourse, Exit D (North concourse) and be escorted to MTR Ho Tung Lau Depot
- 09:45 Technical Talk
- 10:45 Site visit to ROTEM train
- 11:30 Group Photo and Visit Ends
