2nd March 2016

March Function: Technical Talk on Hong Kong International Airport 3 Runway System

Date: Monday 21st March 2016
Time: 6:30 pm to 7:30 pm
Venue: Theatre, 2/F, Fo Tan Railway House

Mr. Collin Chan - Deputy General Manager, Engineering (Third Runway Division) will present a technical talk on the Airport Authority's plan to expand Hong Kong International Airport (HKIA) into a three-runway system to meet future air traffic demand.

The project is not just an additional runway but involves:
- Reclamation of approximately 650 hectares of land north of the existing airport island (equivalent to 34 Victoria Parks) bounded by approximately 13.4 km of seawall. Non-dredge methods, including deep cement mixing technique will be used for reclamation.
- A new 280,000 sq metre passenger concourse with 57 aircraft parking positions capable of handling 30 million passengers per year.
- A 3.8km runway plus associated taxiways.
- A 2.6km long Automated People Mover connecting Terminal 2 with the new passenger concourse.
- A new Baggage Handling System linking Terminal 2 with the new passenger concourse
- Expansion of the existing Terminal 2 into a full-service processing terminal and construction of an associated road network.

<u>Registration</u>

For registration, each participant has to confirm to CHKRI his/her name, employer and contact telephone number. Please provide your membership number and grade at the same time when returning your application by e-mail to secretary@chkri.hk on or before **15th Mar 2016**. Certificate of Attendance will be issued to paid up members ONLY.

Anthony Tong
Secretary, CHKRI
